Eco friendly food service solutions

+ Natural

+ Non-toxic

+ Biodegradable

+ Compostable

+ Made from annually renewable materials

+ Certified by the Biodegradable Products Institute

Good for the planet, great for business

Australia's exclusive supplier of Greenwave products, **ThinkEco** has made going green an easy business solution – and a profitable one, too.

More and more, consumers today are demanding a commitment to the environment from the businesses they custom. Reducing their ecological footprint is a high priority for a growing proportion of the population, and making conscious consumer decisions is one way Australians are opting to make a difference.

It is easy then, to see how choosing **ThinkEco's** Greenwave range for your food service needs will give your business a competitive advantage.

Australia's exclusive supplier of Greenwave products, ThinkEco is leading the way in eco-friendly food service solutions.

Reduced Landfill

Made from natural materials, all Greenwave products are compostable and biodegradable and will completely breakdown. A far cry from traditional plastic and polystyrene products, which take many hundreds of years to decompose.

Choosing Greenwave helps save more of Australia's natural habitat from being engulfed by landfill.

Superior product quality

+ A+ Quality & Durability

+ Waterproof

+ Oil Proof

+ Microwaveable*

+ Can withstand hot & cold temperatures

ThinkEco's range of Greenwave products are available in an assortment of functional designs to suit a wide variety of uses.

Greenwave products are manufactured under strict quality control, ensuring that they consistently conform to the highest standards.

The ability to withstand weight and moisture is essential for food service products: **ThinkEco's** Greenwave collection excels in this regard. Our products are durable and sturdy, and have been designed to maintain their structural integrity.

All of our products have undergone performance testing to guarantee their suitability for freezing as well as microwave use*. As part of **ThinkEco's** commitment to providing eco-friendly solutions to food service professionals, we work closely with Greenwave to continually research, design and develop new products.

* For warm-up purposes only. Suitable for use in a standard Microwave Oven (750Watt) at low/medium setting.

Conserve Natural Resources

A massive 8% of the world's oil production is used to manufacture plastic. As a non-oil-based alternative, Greenwave's products consume considerably less natural resources, particularly fossil fuels, than the production of plastic and polystyrene products.

All of Greenwave's products are made from plant materials derived from corn, sugarcane, grass and reeds. These crops renew annually, making them a sustainable solution.

Reduce Greenhouse Emissions

The copious amount of greenhouse gases emitted in the production of plastics is a major contributor to today's environmental concerns. Many leading scientists strongly attribute climate change to greenhouse emissions.

By choosing a natural alternative to plastic and polystyrene, you are helping reduce your carbon footprint and promoting a healthier planet.

Biodegradable and compostable cutlery

+ A+ Quality

+ Superior Strength

+ Suitable for all hot & cold food

+ Can withstand temperatures
of up to 120°C
